INSTRUMENTS AND EXPERIMENTAL TECHNIQUES

Numbers 1-6, 1967

(A translation of Pribory i Tekhnika Éksperimenta)

CONTENTS

Number 1 January-February, 1967

	Engl.	Russ.
Modern Electron-Diffraction Cameras (Review)—Yu. M. Kushnir, N. V. Alekseev, and N. P. Levkin	1	5
Particle Losses in Cyclic Accelerators and Storage Elements at Nonlinear Resonance and Fine Parametric Resonance—P. R. Zenkevich	17	24
Nonlinear Resonances at Fluctuations of the Square Nonlinearity of the Magnetic Field in the Proton Synchrotron of the Institute of Theoretical and Experimental Physics—P. R. Zenkevich, L. L. Gol'din, A. N. Talyzin, V. I. Nikolaev, L. Z. Barabash, and Yu. S. Pligin	25	30
Approximate Method for Designing a System of Magnetic Lenses for Particle Focusing—E. V. Maikov and V. V. Miller	29	34
Wideband Channel for Power Transmission from an Amplifier to the Accelerating Cavity of a Synchrotron—G. N. Ostreiko, V. S. Panasyuk, A. D. Panfilov, and I. K. Sedlyarov	33	38
Designing Channels for Transporting Particles—B. I. Bondarev	36	41
Effectiveness of Correction of the Equilibrium Orbit in Circular Accelerators—P. R. Zenkevich	38	44
Semiconductor Compton Gamma Spectrometer with Improved Transmission—V. I. Melent'ev, V. V. Ovechkin, and V. S. Rudenko	40	45
Stabilization of the Amplifier of a Gamma Spectrometer with the Use of a Multichannel Analyzer—V. R. Burmistrov and B. Asil'bekov	45	49
Estimation of the Variance of the Total Number of Sparks Accompanying the Development of a Photon-Electronic Shower in a Multilayer Spark Chamber—A. B. Govorkov and B. B. Govorkov	49	54
Method of Determining the Variance of Direction Measurement in a Bubble Chamber—T. Gemeshi, Sh. Krasnovski, and G. Lech'	54	58
The Photographing System of the One-Meter Bubble Chamber—Yu. A. Budagov, V. A. Bychkov, A. G. Volod'ko, V. P. Dzhelepov, V. G. Ivanov, Yu. F. Lomakin, I. Patochka, N. S. Tolstoi, V. B. Flyagin, N. I. Frolov, and P. V. Shlyapnikov	57	61
A Wire Spark Chamber with External Acoustic Pickups—P. Ambro, Yu. A. Karzhavin, V. T. Matyushin, A. T. Matyushin, and P. Shoshev	63	66
A Supply Generator for a Streamer Chamber with a Large Interelectrode Gap—G. A. Vorob'ev, N. S. Rudenko, V. I. Tsvetkov, and M. I. Kozlov	65	68
Diluted Emulsions with a Reduced Shrinkage Factor—L. F. Kirillova, N. A. Lonina, V. A. Sviridov, L. G. Khristov, and M. G. Shafranova	69	72
Estimation of Microdistortions in Type-R Nuclear Emulsions Processed under Various Conditions—V. I. Baranov	71	74
The Characteristics of a Scintillation Counter with an FÉU-66 as Functions of Temperature—A. F. Vedekhin, É. T. Golotkov, V. M. Gribanova, and Yu. P. Pavlov	73	75
A Device for Modeling Potentials of Electron-Optical Systems with a Rectilinear Axis of Symmetry or Asymmetry—Ó. B. Belonozhko, I. S. Gaidukova, and G. V. Der-Shvarts	76	78
Liquid Water-Dioxane Scintillators—L. Ya. Zhil'tsova, E. N. Matveeva, and M. N. Medvedev	78	79
Recording Information from Many Pickups on Narrow Magnetic Tape for Subsequent Computer Processing—S. I. Nikol'skii, B. V. Subbotin, E. I. Tukish, and V. I. Yakovlev	81	81

	Engl.	Russ.
Input of Data of a Physics Experiment into the M-20 Computer from a Narrow Magnetic Tape —V. V. Gavrilov, A. V. Kutsenko, Yu. V. Stupin, and B. V. Subbotin	85	85
Rearrangement of Data Obtained with Multichannel Spectrometers—A. S. Tishechkin and S. I. Chubarov	88	88
System of Multivariate Analysis Programmed from a Luminous Pencil—A. A. Kurashov, A. A. Ogloblin, and V. V. Paramonov	92	91
Hodoscope with Pulse-Powered Gas-Discharge Counters with a Large Number of Cells —Yu. N. Vavilov	96	94
Linear Gate with Low Resolving Time—E. Sh. Egiyan and M. M. Sarkisyan	99	97
Diode Conicidence Circuits—Yu. G. Budyashov, V. G. Zinov, and A. G. Morozov	101	99
Transistorized Correcting Integrator—A. A. Bragin and R. F. Fedoriv	105	102
Compact Fast-Response Electrometer Amplifier—N. A. Danilova, A. V. Parshin, and L. B. Ustinova	109	105
Integrator of Very Low Currents—A. M. Ilyukovich and I. A. Kulikova	112	108
Level Indicator with Transistors and Tunnel Diodes—S. D. Dunaev and M. I. Shchevelev.	114	110
Device for Measuring Maximal Values—A. I. Kordobovskii and Yu. F. Filimonov	116	112
Pulse Generator with a High Repetition Rate—A. D. Grigor'ev	118	114
Device for Shaping Voltages of Complex Form—P. T. Potapenko	120	116
Device for Triggering a Switching Spark Gap with a Light Pulse—V. I. Gazeleridi and V. V. Pedanov	122	118
Transistor Pulse-Height Analyzer with Amplitude-Frequency Conversion—S. I. Gorelkinskaya, V. F. Ostapenko, and L. I. Shmonin	124	120
Wideband Oscillograph Tube for Recording Weak Single Electric Signals—V. S. Gusel'nikov, V. I. Zhavoronkov, and P. A. Tarasov	126	122
Correlation Method of Determining Spectral Characteristics in the Millimeter and Submillimeter Wave Bands—L. I. Fedoseev and D. M. Kozitsyn	129	125
Quantum Generator Using a Beam of Hydrogen Atoms with a Superinvar Resonator—A. I. Nikitin and G. M. Strakhovskii	134	129
Mechanical-Resonance Simulator of Microwave Spectroscopic Signals in the Meter Band —S. B. Grigor'ev, A. M. Sazonov, and D. P. Volnyagin	137	132
Highly Sensitive Radiometer for the 3-cm Band—D. V. Korol'kov and G. M. Timofeeva	140	134
Ion-Optical Apparatus for Producing Ion Probes—I. V. Renskaya, Yu. M. Kushnir, and G. A. Bordovskii	143	137
Operation of a Duoplasmatron with Pulsed Gas Feed—V. V. Mal'tsev, G. A. Otroshchenko, and N. I. Sidorov	146	140
Colorimetric Method of Identifying Isotopes by Gamma Radiation—N. G. Volkov, V. K. Lyapidevskii, and S. D. Chigir'	149	142
Observation of the Spatial Distribution of a Radio-Frequency Field by Means of Luminescence in Gases—B. N. Morozov, N. P. Volkova, and G. A. Arsent'ev	152	145
High-Voltage Regulator for an Electromagnetic Separator—S. M. Naftulin	155	148
Ion Source for Mass Spectral Study of the Energy Characteristics of Molecules—G. G. Il'ina, Yu. S. Rutgaizer, and G. A. Semenov	158	151
Single-Electron Sensitivity of Photomultipliers—V. V. Yakushin	161	154
Measuring the Amplitude-Frequency Characteristics of Photoelectronic Instruments with the Aid of a Laser—A. I. Povrozin and A. I. Sidorov	166	158
Instrument for Measuring Natural Optical Activity and Faraday Effect in the Infrared Region —V. A. Kizel', V. M. Kostrovskii, and V. N. Shamraev	169	160
Studying Single Transients with the Aid of the Compensated Electronic Shutter of the PIM-3 Image Converter—V. A. Davidenko, B. A. Dolgoshein, and S. V. Somov	177	167
Calorimeters for Measuring Short Low-Energy Light Pulses—V. V. Bocharov, V. A. Katulin, and V. G. Smirnov	180	171
High-Temperature Multipass Furnace-Cell for Spectral Studies—S. M. Chernin and A. A. Mal'tsev	182	173

Commutator Version of Rotary Compensation Magnetic-Field Meter—R. M. Polevoi 187 178
Apparatus for Automatic Recording of Internal Friction of Metals—V. A. Melik-Shakhnazarov and I. A. Naskidashvili 190 181
Halite "Thermometer" for X-ray Study of Materials from 77 to 1037°K—V. M. Kozhin 194 185
Apparatus for Measuring Short Lifetimes in Gallium Arsenide—Yu. A. Moma, V. P. Sushkov, and V. S. Abramov 198 189
Autodyne for Observing Epr in Weak Fields—B. F. Alekseev and B. E. Sobotkovskii 201 192
Semiconductor Pickups for EPR Microwave Spectrometers—B. E. Sobotkovskii 203 193
Pneumatic Receiver of Radiant Energy with a Strain-Gauge Sensing Element—A. A. Sivkov and V. V. Gud 205 195
Making Mirrors with the Surface of an Elliptic Cylinder—E. A. Strel'tsov 207 196
Three-Phase Generator of Rotary Magnetic Field—V. M. Ponizovskii, I. A. Maleev, and S. A. Petukhov 208 197
Submicron Layers of Homogeneous Solid Dielectrics—G. A. Vorob'ev and I. S. Pikalova 210 198
Producing a Thin Dielectric Interlayer between Heavy Metal Plates—L. N. Pelikh and V. V. Eremenko 212 201
Thermocouples for Measuring High Temperatures in a Vacuum—G. E. Pletenetskii 214 203
Thermocouple with Increased Sensitivity at 300-450°K—S. Ivanov and L. Vatskichev 216 205
Group Ampule Breaker—S. G. Demidenko and I. P. Lugovaya 218 207
Apparatus for Research from 4.2 to 300°K—V. E. Danil'chenko, L. F. Kurtenok, L. P. Lubyanov, and V. M. Stolyarov 219 208
Carbon Adsorption Pump in an Adiabatic Vacuum Calorimeter for 4.2-300°K G. A. Zaitsev, V. I. Ovcharenko, and V. I. Khotkevich 223 212

REVIEW OF INSTRUMENTS

Improvement of the Stability of the Output Voltage of VS-22 Industrial Regulated Rectifiers —O. F. Afonin and V. V. Filippov 224 213

NEW INSTRUMENTS

IÉKI-1 Meter for the Energy of Coherent Radiation—I. M. Gurevich and F. A. Charnaya 225 214
IÉN-1 Pumping-Energy Meter—I. M. Gurevich and F. A. Charnaya 225 215
SIF-1 High-Speed Pulse Photometer—I. M. Gurevich and L. E. Finkel'shtein 226 215
Instrument for Measuring Lifetime of Excess Carriers in Semiconductor Diodes—I. F. Savchenko.. 227 216

APPENDIX i

Number 2 March-April, 1967

Associative Information Searching with Addressed Memory Systems (Review) —R. G. Ofengenden and F. N. Berezin 229 5
Slow Extraction of the Proton Beam from a 70 GeV Synchrophasotron —Yu. G. Globenko and D. G. Koshkarev 238 14
Aperiodic Magnetizing Coils for Frequency-Modulated Power Autogenerators for Excitation of Accelerating Resonators in Synchrotrons—O. A. Nezhevenko, G. N. Ostreiko, V. S. Panasyuk, and L. I. Yudin 242 17
A Converter for Phase Shift Measurements in a Storage Apparatus —E. A. Pirushkin and T. P. Starodubtseva 245 20
The Shape of Electrodes Measuring the Shift of a Charged Particle Beam —L. L. Gol'din and A. A. Kuz'min 251 27
Sectional Accelerating Tubes with Inclined Fields for Use in Electrostatic Accelerators —A. N. Serbinov 255 30
An Electron Gun of High-Current Proton Accelerator Type—A. A. Glazov and D. L. Novikov 258 33
High-Current Cavity Electron Accelerator—D. V. Iremashvili, N. I. Leont'ev, and A. A. Plyutto 261 35

Remodeling the Atomic Energy Institute Linear Electron Accelerator —N. N. Flerov, V. P. Lipatov, and A. V. Aref'ev 272 45
A Double-Summation Scintillation Spectrometer for Neutrons with Gamma-Discrimination by Scintillation Decay Time—V. I. Kukhtevich, L. A. Trykov, and O. A. Trykov 276 49
Statistical Accuracy of the Measured Resolution of a Scintillation Spectrometer —Yu. A. Tsirlin and V. M. Ékkerman 279 51
Influence of Conical Light Guides on the Characteristics of a Gamma Spectrometer —A. I. Lashuk and I. P. Sadokhin 281 53
A Mössbauer Spectrometer with High Speeds of Movement—K. P. Aleshin, I. I. Lukashevich, V. V. Sklyarevskii, E. P. Stepanov, and N. I. Filippov 284 56
A Spectrometer for Use with the Mössbauer Effect—B. N. Veits, G. G. Gurevich, and Yu. D. Lisin 288 61
Characteristics of a Spark Chamber with Rubber Seals—S. G. Tonapetyan, O. G. Konovalov, M. T. Dorofeev, and A. A. Zybalov 291 64
Microphones for Multiple Particle Detection in an Acoustic Spark Chamber —G. M. Gorodinskii, E. A. Damaskinskii, M. P. Konstantinova, E. M. Kruglov, N. P. Mokrovskii, and A. M. Romanov 295 68
Spark-Chamber Discharge Switch Controlled by Small-Amplitude Pulse —G. M. Gorodinskii, E. A. Damaskinskii, A. S. Denisov, M. P. Konstantinova, E. M. Kruglov, S. P. Kruglov, and N. P. Mokrovskii 299 71
Certain Track Distortions in a Streamer Chamber—M. I. Daion, V. I. Kazurov, and S. A. Krylov 302 73
An Electrophotographic System for Determining the Tracks of Particles in a Spark Chamber—V. A. Biryukov, I. I. Gromova, and A. F. Pisarev 305 77
The MIÉ-1 Semiautomatic Microscope for Measuring the Ionization Parameters of Particle Tracks in Nuclear Emulsions—F. G. Lepekhin, R. M. Raguzin, V. M. Rakitin, and N. M. Fedorova 309 82
Scintillators Based on Mixed Plastics—V. D. Bezuglyi and S. A. Mukhina 311 84
Time Statistics of the Sensitive Volume of a Scintillation Counter—V. V. Yakushin 316 90
A Xenon Scintillation Detector for Rare (n, α) Reactions in a Multilayer Target —I. Kvitek, Yu. P. Popov, and K. G. Rodionov 320 94
A Multilayer Scintillation Detector for Gamma Rays—Yu. P. Popov and M. Stempinski 323 98
Use of the Anisotropy in the Scintillation Response of Stilbene in Directional Neutron Detectors—E. M. Oparin and A. I. Saukov 326 101
A Multiwire Proportional Counter for Selecting Stoppage of Particles in a Thin Gas Target —M. M. Kulyukin, D. B. Pontecorvo, I. V. Falomkin, D. M. Khazins, and Yu. A. Shcherbakov 330 105
A Collector Calorimeter for Measuring the Energies of Accelerated Electrons —G. B. Radzievskii, P. Ya. Glazunov, and A. N. Varin 334 109
An Apparatus for Measuring Trace Amounts of Ar^{37}—I. R. Barabanov, V. B. Veshnikov, and A. A. Pomanskii 337 112
Multichannel Pulse-Amplitude Ratio Analyzer—A. P. Nekhai and V. V. Marchenkov 342 117
High-Speed Digital Printer for Information Retrieval from Multichannel Measuring Systems —V. A. Vladimirov and V. N. Zamrii 348 123
The Selection of Circuits for Pulse Counting Systems—M. N. Ivanov and V. I. Kadashevich 352 127
Controlled Mode of Operation of FÉU-36 Photomultiplier—Yu. D. Klebanov and L. A. Lozina . 355 129
Variable Time Delay Generator—V. A. Vizir', and P. P. Krasnonosen'kikh 358 133
Oscillator Stabilization with a Frequency Meter—I. M. Beskrovnyi, A. A. Skakodub, and N. D. Fedorov 361 136
Distributed Gain Amplifier Using Tunnel Diodes—D. A. Kabanov 368 142
Voltage Divider with Electronically Switched Transfer Constant—G. S. Orduyan and A. V. Pipinov 368 142

Spectrometer for Spin-Echo Observations—V. B. Ustinov, L. A. Rassvetalov, and D. N. Chartorizhskii 370 144
Method for Point Measurement of Microwave Field in Plasma Investigations —V. V. Krylov and O. I. Popyrin 373 147
Rogovskii Loop for Measurement of Currents of Nanosecond Duration—A. M. Stefanovskii 375 149
Electrolytic Low-Inductance Resistors—S. N. Popov and L. V. Proskurovskii 379 153
An Electron Multiplier Attachment Giving Improved Characteristics in a Quadrupole Mass Spectrometer—G. I. Slobodenyuk and A. I. Titov 381 155
New Standard Photomultipliers of Venetian-Blind Type—G. S. Vil'dgrube, N. V. Dunaevskaya, I. D. Manuilov, M. V. Zavarina, and A. V. Vanina 384 159
Examination of Light Beams Modulated in the GHz Range with Ordinary Photomultipliers —I. E. Zalesskii, A. M. Potapov, I. Z. Rutkovskii, and S. S. Shushkevich 388 164
The ZÉP66 Automatic Polarimeter—L. V. Ksanfomaliti 391 167
Measurement of Magnetostriction at Low Temperatures with Aid of Super-Conducting Solenoid—V. I. Sokolov 396 173
Micromachine for the Strain Analysis of Metal Samples at Temperatures Down to 1.3 °K —V. V. Pustovalov, G. S. Med'ko, V. S. Mironov-Kopysov, and N. I. Mokryi 399 176
A High-Aperture Evacuated X-ray Monochromator with a Fixed Receiver Section —L. G. Eliseenko, V. N. Shchemelev, and M. A. Rumsh 403 180
Study of Transient Processes in Semiconductors by Means of Regenerative Microwave Systems—E. M. Gershenzon, L. A. Orlov, and É. L. Shimicheva 407 185
A Universal Apparatus for Synthesis and Crystallization of Semiconducting Materials —I. I. Tychina, V. G. Fedotov, V. K. Mityurev, V. P. Chernyavskii, and A. G. Bychkov 411 188
Complementary Transistor Dc Amplifier Stage—V. L. Zmudikov 414 192
Automatic Regulation of the Adiabatic Region of a Low-Temperature Calorimeter —V. M. Mamnitskii 415 193
An Adjustment Mechanism with Elastic Links—G. V. Galutva 420 198
On the Ionization of Gas in the Accelerating Space of a Gas-Filled Neutron Tube —Yu. I. Sokolov 422 199
Operational Experience with a Linear Electron Accelerator—Yu. D. Kozlov and A. S. Yakushin 425 202
Luminophor Composition Based on ZnS(Ag) and Li^6F Registration of Slow Neutrons —A. F. Vedekhin 427 203
Nonuniformity of Collection of Light from Large Scintillators by Various Light Pipes —S. G. Tonapetyan, O. G. Konovalov, M. T. Dorofeev, and A. A. Zybalov 429 204
Requirements on Optical Heads for Bubble Chamber Stereocameras —E. M. Andreev, G. Libman, and G. I. Selivanov 431 206
Method of Adjusting Stereocameras—E. M. Andreev, G. Libman, and G. I. Selivanov 432 207
Two-Particle Registration Efficiency of Argon-Acetylene Filled Spark Chamber —Yu. T. Kiselev, Yu. V. Terekhov, and V. I. Ushakov 433 207
Direct Readout Register for Spark Chambers—A. G. Grachev 434 208
Expander for High-Resolution Amplitude Analysis—A. I. Gonchar and A. N. Utyuzhnikov ... 436 210
Light Pulse for Spark Chamber Control—A. K. Dzhavrishvili, V. A. Mikhailov, and V. N. Roinishvili 438 212
Simple Transistor Amplifier with Stray Pickup Suppression—M. Z. Chapovskii 439 213
High Frequency Correction in Nonlinear Amplifier Circuits Using Vacuum Tubes with Secondary Electron Emission—O. S. Kolotov 441 215
Pulse Generator with Adjustable Delay Using Tunnel Diodes—S. D. Dunaev and M. I. Shchevelev 443 217
Semiconductor Pulse Modulator for a High Frequency Tube Oscillator—V. A. Rezvov and L. I. Yudin 445 219
Ultimate Vacuum Attainable by Adsorbtion of Air with Liquid Nitrogen Cooled Activated Charcoal—B. G. Lazarev, A. L. Donde, and V. I. Sharonov 447 220
Rubber-Lead Seal—V. S. Gumenyuk 448 221

An All-Metal Vacuum Seal Gasket—S. I. Gendel', V. I. Karpov, and L. E. Levina 449 223
Interferometer for Measurement of Small Changes of Refractive Index —V. V. Korobkin, A. A. Malyutin, and M. Ya. Shchelev 450 223
Attachment to UR-10 Spectrophotometer for Measurement of Reflection Coefficients —A. A. Kukharskii 452 225
Ultrasonic Device for Measuring the Emissive Power of a Laser—A. N. Bondarenko, G. V. Krivoshchekov, and S. I. Marennikov 453 226
Cuvette for Study of Stimulated Emission in Solutions—A. V. Aristov and Yu. S. Maslyukov .. 455 228
A PTFE Cell for use with Corrosive Media in the Range 0.22-7 μ—P. A. Zagorets and G. G. Mikhailov 457 229
Measuring the Secondary-Emission Characteristics of Dielectrics and Semiconductors —L. F. Afonina and G. B. Stuchinskii 458 231
Method for Measuring the Electric Parameters of Thin Films—A. M. Spitsyn 460 232
Production of Thin Films of Lead by Diffusion Evaporation—V. F. Kuznetsov, V. V. Nikitin, and B. N. Formozov 461 233
Cryostat for Electron-Diffraction Investigations at Temperatures 300-4.2°K —S. I. Kovalenko and V. A. Godovannyi 463 235
85 kgauss Superconducting Magnet from Nb + 75% Zr Alloy Wire—I. N. Goncharov 464 236
Arrangement for Testing Microsamples at Temperatures from 1.3-1200 °K—I. A. Gindin, S. F. Kravchenko, Ya. D. Starodubov, and G. G. Chechel'nitskii 468 240
n-Type Indium Antimonide Magnetoresistive Magnetic Field Sensor for Helium Temperatures —V. A. Danilychev 470 242
Simple Arrangement for Production of Temperatures down to 0.55 °K by Pumping Helium-3 —D. I. Vasil'ev 472 243

NEW INSTRUMENTS
X-ray Shadow Microscope MIR-1—V. A. Zelentsov 473 245
Remotely Controlled X-ray Diffractometer DRD-1—V. A. Zelentsov 473 245
Fast Semimicroanalytic Balance OVM-20—V. A. Zelentsov 474 246
Ion Counter S1-01—V. A. Zelentsov 474 247

Number 3 May-June, 1967

Plasma Sources of Ions of High-Melting Elements (Survey)—M. D. Gabovich 477 5
A 10-MeV Synchrotron Based on a Smooth Curved Waveguide—A. A. Vorob'ev, N. P. Didenko, V. L. Kaminskii, and Yu. I. Potekhin 490 20
Effect of Excitation Winding on Nonlinearity of Magnetic Field in a Quadrupole Lens with a Circular Aperture—N. I. Doinikov and G. N. Samsonov 492 22
Using a Photoproton Spectrometer to Calibrate the Scale of Maximum Bremsstrahlung Energies of Electron Accelerators—V. P. Denisov and L. A. Kul'chitskii 496 25
SHF Waveguide Channel for 30-MeV Microtron—I. M. Matora and R. V. Khar'yuzov. 499 28
Device for Studying Electron Beams in the Crossover Region—N. S. Zinchenko and I. V. Lopatin 503 32
Device for Measuring the Profile of a Beam of Accelerated Electrons—V. A. V'yalitsin, I. A. Prudnikov, and I. R. Ryabukhov 507 36
Determination of Radial-Angular Characteristics of an Accelerator Beam —G. K. Dem'yanenko and P. M. Ryabka 510 38
Some Problems of Pulse Power Supplies for Betatron Electromagnets—L. M. Anan'ev and Yu. A. Otrubyannikov 512 40
Gas Target for Experiments with Slow Mesons—P. F. Ermolov, V. I. Lepilov, and A. I. Mukhin 513 41
120-Liter Bubble Chamber with Magnet for Heavy Liquids—I. I. Pershin, V. M. Golubchikov, N. S. Konoplev, A. A. Nikitin, and T. A. Chistyakova 515 43

Characteristics of High-Pressure Spark Chamber—G. S. Akopyan, N. Kh. Bostandzhyan, G. A. Marikyan, and K. A. Matevosyan	517	45
Symmetric System of "Double" Wire Electrodes for a Spark Chamber—B. N. Gus'kov, A. T. Matyushin, V. T. Matyushin, and R. Firkovskii	520	47
Instrument for Assembling and Marking Emulsion Chambers—B. V. Maraev, M. I. Trukhin, and V. M. Shcherbakov	523	50
Inherent Noise of Corona Counters—Yu. M. Tolchenov	525	52
Directional Flat-Response Neutron Detector—I. V. Goryachev, M. M. Gvozdev, V. I. Kukhtevich, and L. A. Trykov	529	56
Compensation of Counting Losses in Systems with Many Pickups—N. N. Balamatov and B. I. Goryachev	532	59
Time Analyzer for Studying $\mu \rightarrow e$ Decay—E. A. Meleshko, B. A. Nikol'skii, and B. V. Sokolov	535	61
Simple Digital-Stabilization Circuit for Multichannel Gamma Spectrometer —M. K. Efimchik, É. I. Podol'nyi, and A. F. Chernyavskii	540	67
Input Device for Semiconductor-Detector Spectrometric System—S. G. Basiladze and I. F. Kolpakov	543	70
Generators for Streamer Chambers—I. A. Golutvin, Yu. V. Zanevskii, Yu. T. Kiryushin, and V. I. Ustinov	547	74
Driven Generator Using A Tunnel Diode and a Short-Circuited Delay Line —A. A. Ivanov, V. S. Nesterenko, and L. A. Timokhin	550	77
Univibrators Using Transistors with Complementary Symmetry—L. S. Gorn, I. D. Ivanov, and B. I. Khazanov	555	82
Transistor Audio Oscillators with Output-Voltage Amplitude Stabilization —A. A. Bogdanov and I. D. Ivanov	558	85
Oscillographing Pulses with an SHF Carrier—M. M. Filippov, A. N. Bukin, and V. I. Zhavoronkov	561	88
Sensitive High-Speed Oscillograph—B. A. Utochkin, Yu. V. Rodnov, and O. A. Glupova	565	92
Differential Discriminator Using Ferrite Cores with a Rectangular Hysteresis Loop —G. P. Beznosov and A. V. Samoshin	569	96
Measuring the Value of and Small Variations in the Q of SHF Resonators —S. A. Shmulevich	571	97
Pulse Circuit Using Silicon Controlled Gates for Exciting Semiconductor Optical Quantum Generators—V. I. Osinskii and V. V. Mikhnevich	573	99
Automatic-Frequency-Control System Using a Superconducting Resonator —F. F. Mende, V. M. Dmitriev, E. V. Khristenko, and G. E. Churilov	575	102
Using the RÉ-1301 EPR Spectrometer with a Spectrum Adder-Accumulator —V. P. Zelenin and G. I. Subbotin	579	106
Method of Continuous Ultramicroscopy for Studying the Origin of a New Phase in a Hydrocarbon Medium at Low Temperatures—B. V. Deryagin, K. O. Averbakh, G. S. Gol'din, and O. K. Smirnov	581	108
Attachment to G5-7A Generator for Spin-Echo Spectrometer—L. N. Novikov	584	110
Improvement of Contactless Hall Pickups of the Intensity of Charged-Particle Beams —V. I. Pogodin, A. P. Shchelkin, and G. A. Yur'eva	587	113
Self-Excited Indicator of the Position of Equipotentials in Modeling Electrolytic Baths —V. A. Dvinskikh	589	115
Heavy-Duty Voltage Regulator for Physics Apparatus—A. A. Glazov and M. M. Semenov	591	117
Transistorized Voltage Regulator with a High Regulation Factor—R. É. Bagdasarov	594	120
Possibilities for Increasing the Sensitivity and Accuracy of Mass Spectrometric Measurements—P. I. Chalov and U. Mamyrov	597	123
Quartz Knudsen Cell—V. V. Sokolov and A. S. Pashinkin	600	126
Evacuation Speed and Current of Magnetic-Discharge Pumps at Low Pressures —E. M. Rudnitskii	602	127
Cold Diffusion Pump—L. V. Falaleev and A. B. Tseitlin	604	129

	Engl.	Russ.
Cooled Titanium Sorption Pump—N. E. Biryukova, M. I. Vinogradov, K. D. Danilov, and S. S. Shishlovskii	610	135
Wiring Photomultipliers for Measuring Logarithm of Intensity—L. B. Katsnel'son, F. I. Kogan, and V. I. Lagutin	613	139
Study of FÉU-63 Photomultiplier—Yu. A. Kulinich, V. G. Rukavishnikov, and R. S. Shuvalov	616	141
Transistor Stabilization System for a Photomultiplier with a Semiconductor Light-Pulse Source—A. N. Gadalov and Yu. V. Mineev	619	144
Delayed Emission from Photomultiplier Dynodes—A. N. Pertsev and L. D. Soshin	622	147
Semiconductor Light-Pulse Generator—A. N. Gadalov and Yu. V. Mineev	626	150
Quantitative Methods of Studying Heterogeneities in Transparent Media with an IAB-451 Shadow Instrument—A. K. Beketova, A. F. Belozerov, V. P. Sarychev, and V. I. Yanichkin	628	152
Neodymium-Glass Two-Channel Optical Quantum Generator with an Energy of 180 J —M. P. Vanyukov, V. A. Venchikov, V. Ya. Zhulai, V. I. Isaenko, and V. V. Lyubimov	634	158
Generator of Nanosecond Light-Pulse Trains—V. G. Gorbenko, V. G. Lapshin, V. I. Rykalin, Z. Tsisek, and V. P. Khromov	637	161
Nanosecond Light-Pulse Generator—Yu. V. Vvedenskii	641	165
NMR Magnetic-Field Discriminator and Magnetrometer Automation—V. M. Lachinov	643	166
Measuring Magnetic Anisotropy in Strong Pulsed Fields—R. Z. Levitin and B. K. Ponomarev	648	171
Magnetic Balance with a Piezoelectric Pickup for Measuring Magnetization in Pulsed Magnetic Fields—A. T. Starovoitov and V. A. Bokov	650	174
Method of Measuring The Susceptibility of Weak-Magnetic Materials under Pressure—A. S. Panfilov and I. V. Svechkarev	655	179
Using a Light Probe to Study the Structure of p-i-n Semiconductor Detectors and Determine Electron Lifetime in their p Regions—V. S. Vasilev	657	181
Recording Beta Radiation with Thin Layers of Scintillation Granules —A. Ya. Gel'fman, V. M. Solomonov, Yu. A. Tsirlin, and V. M. Ékkerman	659	182
Metal Instrument for Studying Galvano- and Thermomagnetic Effects in Semiconductors—M. I. Aliev, G. I. Safaraliev, M. A. Alieva, and S. A. Zeinalov	661	184
Using Electrostatic Accelerators in Radiochemical Research and Processes —D. M. Margolin, L. V. Chepel', K. G. Yanova, V. D. Terekhov, B. V. Maslov, and V. F. Pikel'ni	663	186
Electrically Conducting Polyethylene for Spark-Chamber Electrodes—Yu. T. Kiselev and V. I. Ushakov	664	187
Gas-Discharge Operating Conditions of Oxygen Counters—A. I. Filatov and V. G. Chaikovskii	666	188
Pulse Delay in a Halogen Counter—A. I. Filatov	668	190
Ring Counter with Digital Indication—V. P. Bakalinskii, V. V. Bugaenko, and V. P. Tsymbal	669	191
Pulse Counter with Digital Indication—L. A. Bogorad and M. B. Zhdanova	671	192
Ferrotransistor Register with Sequential Interrogation—N. T. Nikityuk	673	194
Refinement of Measurements of Resonator Q—V. A. Malyshev	675	195
Discriminator with an Intermediate-Frequency Error Signal for Automatic Frequency Control of a Reflex Klystron—F. F. Mende, V. M. Dmitriev, E. V. Khristenko, and G. E. Churilov	676	196
Wideband Transistor Amplifier—Yu. N. Prozorovskii and V. A. Binevich	678	197
Avalanche-Transistor Pulse-Traing Generator—V. F. Chechetenko	679	198
Output Stage of Pulse Generator with Low Internal Impedance—M. Drazhev and G. Stainov	681	199

Using Lengths of Coaxial Cable in Circuits of Nanosecond Blocking Generators —O. S. Kolotov and V. A. Pogozhev 683 201
Calibration of Pulse-Height Discriminators—A. M. Geidel'man, L. I. Kalinkina, and B. S. Kovrigin 685 202
Making Electron-Microscope Specimens from Foils by Bilateral Electropolishing —Yu. A. Kirsanov, V. G. Rakin, and O. D. Shashkov 687 204
Reducing Reflection by the Ends of a Ruby Crystal—V. A. Zubov 689 205
Visualization of Stationary Wave Fields by Combined Raster Recording of Oscillation Amplitude and Wave Fronts—V. K. Kuznetsov 690 207
Cryostat for Magnetooptical Research—V. N. Pavlov and V. V. Eremenko 692 208
Remotely Cooled Intrachannel Reactor Cryostat—É. L. Andronikashvili, L. A. Vadachkoriya, and L. A. Zamtaradze 694 211

CHRONICLES
Eighth All-Union Conference on Automatic Monitoring and Electrical-Measurement Techniques—R. D. Baglai 696 213

NEW INSTRUMENTS
LV-01, LV-02, LV-03, and LV-04 "Time Loop" Instruments— A. S. Bryukhanov 698 214
Automatic Frequency Marker for Microwave Spectroscopy—A. S. Gur'evich, B. N. Kharin, S. P. Pan'ko, and V. I. Shibaev 700 215

Number 4 July-August, 1967

Measurements Using the Single-Electron Component of Photomultiplier Noise (Survey) —A. N. Pertsev and A. N. Pisarevskii 701 5
Producing a γ-Quantum Beam by the Compton Effect with Relativistic Electrons—O. F. Kulikov, Yu. Ya. Tel'nov, E. I. Filippov, and M. N. Yakimenko 710 14
Designing Sectional Accelerating Tubes with Oblique Fields—A. N. Serbinov and A. V. Mazhulin .. 715 19
Double Microtron—K. A. Belovintsev, A. V. Borisov, S. I. Kostyukov, V. G. Lapchinskii, V. I. Lebedev, and P. A. Cerenkov 717 22
Limiting Current in a Linear Accelerator—B. I. Bondarev and V. V. Pashkovskii 719 24
Economical Source of Negative Tritium Ions—Yu. M. Khirnyi and L. N. Kochemasova 721 25
Producing a Beam of Negative Hydrogen Ions with Energy to 1.5 MeV and Current to 1 mA —G. I. Dimov, I. Ya. Timoshin, V. V. Demidov, and V. G. Dudnikov 725 30
Obtaining Multiply-Charged Germanium Ions on the Bench and in a Cyclotron—A. S. Pasyuk and Yu. P. Tret'yakov 730 35
Scintillation γ Spectrometer with Protective Envelope for Measuring γ-Ray Spectra of Resonance Neutron Capture—F. N. Belyaev, K. G. Ignat'ev, and A. N. Soldatov 732 37
Stabilizing a Scintillation Spectrometer with a Multichannel Pulse-Height Analyzer —A. V. Murzin and M. M. Tuchinskii 735 40
Liquid-Hydrogen Bubble Chamber with 55×35×30-cm Volume—L. A. Vetlitskii, V. M. Guzhavin, G. K. Kliger, V. Z. Kolganov, A. V. Lebedev, G. S. Lomkatsi, S. Ya. Nikitin, V. T. Smolyankin, A. P. Sokolov, E. A. Sysoev, and L. I. Tabolina 738 43
Proportional-Counter Controlled Streamer Chamber for Recording Slow-Meson Stops —M. M. Kulyukin, D. B. Pontecorvo, L. V. Falomkin, D. M. Khazins, and Yu. A. Shcherbakov 743 48
Determining Particle Coordinates with Wire Spark Chambers with a Ferrite Memory —T. L. Asatiani, V. I. Kovalenko, A. N. Prokhorov, and V. N. Prokhorov 748 53
Complete Computer Processing of Experimental Data Obtained by Nuclear-Emulsion Method —G. M. Bukat, V. I. Verkhoglyad, N. M. Vershilova, F. G. Lepekhin, M. M. Markarov, V. V. Sarantsev, L. N. Tkach, and L. L. Shitikova 752 57
Estimation of Fast-Particle Energy from Ionization Measurements in Nuclear Emulsions —F. G. Lepekhin, M. M. Makarov, and V. V. Sarantsev 755 60
Paths of Ions of Light Elements in NIKFI-Ya2 Photoemulsion—L. S. Dmitriev and Ya. A. Teplova ... 758 62

Method of rem Measurement in Fields of Mixed γ and Neutron Radiation—L. B. Keirim-Markus, V. V. Markelov, and I. V. Chernykh	761	65
Using a Photomultiplier in Dosimetry of Powerful Pulses of X-Ray Radiation—K. Bekturganov and G. A. Gumanskii	764	67
Systems for Connecting, Decoupling, and Grounding Units of Nuclear Electronic Apparatus —K. É. Érglis	767	70
Coincidence and Anticoincidence Circuit with Maximum Count Rate of 40 MHz—Yu. B. Bushnin, A. F. Dunaitsev, and V. S. Sen'ko	771	74
Nanosecond Coincidence Circuit for a Multichannel Recording System—V. M. Suvorov and A. I. Shchetkovskii	776	79
Address Counter with Parallel Input and Ripple-Through Carry of the Control Signal —V. E. Ivchenko	779	82
Microsecond Width-Height Converter—S. G. Basiladze	782	85
Communication-Line Transmission of Data from a Measuring-Recording Center to a Computer —V. V. Gavrilov, A. M. Klabukov, A. V. Kutsenko, Yu. V. Stupin, and L. V. Shtranikh	789	92
Linear Microsecond-Pulse Gate—K. G. Rodionov and Heng Eeng Kin	795	98
Simple Data Output from an AI-100 Analyzer to an ÉPP-09 Recording Potentiometer —A. P. Grumbkov	798	101
Superconducting Strip Delay Line—G. V. Glebovich	800	103
Electronic Graph Converter—V. I. Baryshev, Yu. B. Dvoeglazov, A. A. Kuznetsov, K. K. Charnetskii, and A. S. Poletaev	803	106
Short-Current-Pulse Generator—S. T. Latushkin and L. I. Yudin	807	110
Transistor Nanosecond-Pulse Amplifier—A. M. Siz'min	810	113
Radio-Frequency Pulse Generator—V. N. Lazakov	812	115
Effective-Fluctuation-Noise-Voltage Meter—V. I. Vasil'ev, V. S. Grigor'ev, and V. F. Peterson	814	117
Stabilizing the Frequencey of a Klystron in the Millimeter Range with an Open Resonator —Ya. L. Shamfarov	816	119
8-mm Pulse Spectrometer for Studying Magnetic Resonance—A. G. Gurevich, E. L. Golovenchits, V. D. Voronkov, and D. E. Gromzin	818	121
Methods of Studying Acoustic Paramagnetic Absorption at 10^6 to $2 \cdot 10^8$ Hz—Yu. V. Vladimirtsev and V. A. Golenishchev-Kutuzov	822	125
Laboratory Method of Exciting Microwave Phonons of ~10 GHz—S. N. Ivanov, G. D. Mansfel'd, and B. G. Stepanov	825	128
Nuclear Magnetometer—E. M. Grishchenko	828	131
Cavity Resonators for Studying EPR with Uniaxial Pressure on Sample—M. M. Zaitov	831	134
Using Parametric Resonance in an Effective Field to Measure the Amplitude of a Radio-Frequency Magnetic Field—L. N. Novikov	833	136
Using a Spiral Resonator in the Oscillation Method of Measuring Small Capacitances —B. G. Udovidchenko	835	138
Measuring the Photoconductivity of Semiconductors in the SHF Band—E. A. Sokolov, V. Kh. Brikenshtein, and V. A. Benderskii	838	141
Method of Studying the Temperature Characteristics of Ferroelectrics at Superhigh Frequencies —Yu. M. Poplavko and B. Ya. Yazytskii	841	144
Contactless Measurement of Vibrations—E. A. Zharov and V. I. Smyslov	844	147
Multilayer Adiabatic Jackets—P. L. Privalov	847	150
Regulated Transistor 1-1.5-kV dc-to-dc Converter—M. B. Leitman and R. K. Pakhlavuni	850	153
Device for Direct-Current Regulation—V. A. Borisov	852	154
Magnetic-Field Stabilizer for β Spectrometers—A. Kuklik	855	157
Thermostated System for Sample Vaporization in the Ion Source of a MKh-1303 Mass Spectrometer—A. M. Zyakun	860	162
Mass Spectrometer for Measuring the Isotopic Ratio of Trace Amounts of Noble Gases —V. F. Teplykh, K. A. Petrzhak, and M. G. Pan'yan	863	165
Method and Apparatus for Highly Sensitive Leak Detection—V. I. Karpov, L. E. Levina, and L. D. Murav'eva	866	168

Ultrahigh-Vacuum Apparatus for Calculation and Collation of Ionization Gauges—B. A. Sharevskii .. 869 171
Safe Wide-Range Radioisotope Ionization Gauge—L. P. Khavkin 874 177
Measuring the Frequency Characteristics of Photoelectronic Devices with a Tunable Laser —A. I. Povrozin and A. I. Sidorov..... 876 179
Study of an Electrostatic "Memory" for an Image Converter—G. B. Bondarenko, M. M. Butslov, S. V. Somov, and A. P. Tsitovich 879 182
Method of Measuring the Doppler Shift of a Spectral Line with the Aid of an Optical Wedge —D. N. Mirshanov..... 883 185
High-Temperature Furnace-Cell with a "Rectangular" Temperature Field for Spectral Research —S. M. Chernin, A. A. Mal'tsev, and A. D. Svenchanskii 886 189
Measuring High Amplitudes of Mechanical Vibrations by the Moiré-Band Method—B. S. Davydov ... 889 192
Determining the Optimum Transmission Coefficient of the Output Mirror of a Laser —M. M. Drozdov and V. I. Matveev 891 194
Apparatus for Creating Pulsed Magnetic Fields of up to 1.2 MOe—Kh. S. Bagdasarov, S. B. Dokhnovskii, V. N. Ershov, and V. V. Okinshevich 893 196
Pulse Magnet for a Bubble Chamber—V. K. Makar'in 896 199
Regulating and Measuring the Current of the Pulsed Beam of a Linear Electron Accelerator —Yu. D. Kozlov, M. D. Matyukov, and V. I. Sekachev 898 201
Nanosecond-Pulse Shaper for Scintillation Detectors—S. S. Batalin, Yu. A. Lysikov, and Yu. K. Shubnyi 900 203
High-Speed Comparison Circuit—V. V. Tsokanov 902 204
Circuit with Feedback for Exciting an ac Generator—F. I. Mineev 904 206
Powerful Square-Pulse Generator with a Controllable Thyratron Switch—N. I. Zinchenko, V. N. Rybin, and V. N. Cherepanov 905 207
Controlling Maximum Output-Pulse Width in Circuits of Regulated Pulse Transformers —O. T. Lebedev 907 208
IS-2 Spectrogram Integrator—L. N. Gal'perin and L. B. Mashkinov..... 909 210
Multichannel Molecular-Beam Shaper—N. A. Meshcheryakov, B. V. Perfil'ev, D. R. Gabe, and A. I. Trubetskoi 911 212
Opticoelectron System for Studying Fluctuations of Molecular-Beam Density —N. A. Meshcheryakov and P. P. Yushkov 913 214
Ballastless Diaphragm Differential Pressure Gauge—V. A. Tsymarnyi and V. A. Elema 915 216
Secondary Electron Emission and Contamination of Metal Surfaces—S. K. Kulov and L. G. Sherstnev..... 917 218
Obtaining High-Temperature Vacuumtight Joints when Gluing Parts with Vacuum Cement —N. A. Meshcheryakov, L. A. Kabanova, and B. I. Boiko 919 219
Measurement of Rapidly Changing Pressure—É. M. Barkhudarov, B. G. Dzhinchvelashvili, and B. P. Zhvaniya 921 220
Elastic Vacuum Connector—I. S. Sidorenko and G. P. Shemonaev 923 221
Dismountable Electron Gun—B. R. Knyazev and V. A. Vishnyakov 924 222
Laboratory Electron Gun—V. I. Petrov and A. P. Kobarenkov 926 224
High-Speed Compact Photon Counter—V. V. Artem'ev, L. N. Gus'kov, and V. N. Mikhailov 928 226
Polarizer for the Infrared Region—S. N. Baranovskii, D. D. Berezikov, and L. L. Mendrin 930 228
High-Current Continuous-Action Cathodes for Argon-Ion Lasers—V. I. Donin, V. M. Klement'ev, and V. P. Chebotaev 932 230
Using a Cable Pulse Transformer in the Power System of a Gas Laser—A. S. Nasibov, A. A. Isaev, V. M. Kaslin, and G. G. Petrash 934 232
Laser with External Mirrors for Low-Temperature Experiments—A. A. Kaminskii and N. I. Sukhov ... 936 233
Memory-Tube Recording of a Monopulse of a Q-Modulated Laser—B. M. Ashkinadze, V. M. Rysakov, L. M. Fishman, and L. D. Yaroshetskii 938 234
Fabry-Perot Interferometer with Electromechanical Scanning System—F. Ya. Ragimov and V. G. Koloshnikov 939 235
Fabry-Perot Interferometer with Remote Control—L. V. Skokov and G. I. Kromskii 941 237
Plastic of Increased Transparency—M. I. Frolova, L. V. Chekmodeeva, and A. G. Khabakhpashev 943 239

Simple Vessel to be Placed in a Laser Resonator for Studying Light Diffusion in Liquids —E. V. Tiganov 944 240
Vibration-Proof Optical Contact Using Epoxy Resin—G. S. Dragun 946 241
Device for Creating Constant Angular Acceleration—L. P. Varfolomeev, I. Sh. Libin, and A. K. Shestakov 947 242
Active Damping of the Oscillations of a Model Suspended in a Stream—É. M. Drobyshevskii and S. I. Rozov 949 243
Apparatus for Remote Measurement of Conductivity and Hall Effect in Semiconductors during Irradiation—A. I. Makarevich and L. Yu. Raines 951 245
Studying p-i-n Silicon Detectors with a Traveling Light Probe—V. S. Vasilev 952 246
Ohmic Contacts on Silicon—V. V. Voskoboinikov and S. P. Sinitsa 953 247
Determining the Width of a Compensated Region in Germanium p-i-n Detectors by the Light-Probe Method—V. S. Vasilev and É. Z. Ryndina 955 249
High-Temperature Hermetic Lead for Thermocouples—V. I. Petrov and A. P. Kobarenkov 958 251
Apparatus for Studying Local Static and Pulse Characteristics of Thin Films—A. L. Logutko and N. M. Salanskii 959 252
Nitrogen Line with Low Heat Losses—V. P. Konyaev, E. A. Maslennikov, and É. I. Sadovskii 961 253
Simple Method for Separating a Neon-Helium Mixture—V. E. Keilin and G. A. Kontsevov 963 254
Superconducting Resonator-Solenoid—L. E. Blagosklonskaya, E. M. Gershenzon, N. A. Serebryakova, and I. Yu. Shebalin 965 256
Method for Making Superconducting Thermometers—E. Ifft and A. I. Shal'nikov 967 258

NEW INSTRUMENTS
MS-62 Mass Spectrometer 969 260
MSKh-3 "Khronotron" Mass Spectrometer 970 261
K105 General-Purpose Twelve-Channel Loop Oscillograph 971 261
MF-1 "Agat" Microwave Phase Meter 972 262
IK-62 Measuring Chamber 973 262

Number 5 September-October, 1967

On the Occasion of the Fiftieth Anniversary of the Great October Socialist Revolution 975 5
The 25 MeV I-2 Linear Proton Accelerator—V. A. Batalin, E. N. Danil'tsev, A. A. Zhdanko, I. M. Kapchinskii, V. G. Kul'man, N. V. Lazarev, B. P. Murin, I. Kh. Nevyazhskii, V. K. Plotnikov, B. I. Polyakov, and N. K. Titov. 978 9
The I-2 Linear Proton Accelerator. I. Characteristics of the Longitudinal and Transverse Motion of Particles—I. M. Kapchinskii and V. K. Plotnikov 982 12
The I-2 Linear Proton Accelerator. II. The High-Frequency Accelerating System —V. G. Andreev, V. G. Kul'man, V. V. Kushin, I. Kh. Nevyazhskii, N. S. Podoinitsyn, N. K. Titov, E. A. Khesed, and V. B. Chistov 989 19
The I-2 Linear Proton Accelerator. III. The Focusing System—R. M. Vengrov, M. D. Veselov, G. V. Veselova, E. N. Danil'tsev, I. M. Kapchinskii, A. M. Kozodaev, R. P. Kuibida, N. V. Lazarev, V. K. Plotnikov, and N. S. Strel'tsov 998 28
The I-2 Linear Proton Accelerator. IV. High-Frequency Supply System—V. I. Bobylev, Yu. D. Ivanov, A. V. Mishchenko, I. Kh. Nevyazhskii, and B. I. Polyakov 1004 34
The I-2 Linear Proton Accelerator. V. Electronic Instrumentation—A. D. Belov, K. I. Guseva, N. K. Kaminskii, B. P. Murin, and L. Yu. Solov'ev 1009 40
The I-2 Linear Proton Accelerator. VI. Vacuum System—V. V. Koloskov, K. K. Onosovskii, M. I. Basalaev, N. M. Kristi, and K. V. Kuznetsov 1012 43
The I-2 Linear Proton Accelerator. VII. Assembly, Equipment, and Auxiliary Systems —A. A. Zhdanko, V. N. Kapalin, N. V. Kovalev, V. V. Koloskov, N. V. Lazarev, V. Ya. Miller, É. A. Mirochnik, and V. I. Édemskii 1016 47
The I-2 Linear Proton Accelerator. VIII. Observing the Behavior of the Foundation —N. I. Porubai, E. N. Danil'tsev, I. M. Kapchinskii, and M. V. Shchelkanov 1021 52

The I-2 Linear Proton Accelerator. IX. Adjusting the Drift Tube—E. A. Khesed	1025	55
The I-2 Linear Proton Accelerator. X. Preparation of Preinjector Prior to Start-Up and Basic Characteristics of Beam at Preinjector Output—V. A. Batalin, B. K. Kondrat'ev, V. I. Moguchev, N. F. Ivanov, and A. I. Solnyshkov	1030	60
The I-2 Linear Proton Accelerator. XI. Adjustment of Acceleration Mode and Beam Parameters—V. A. Batalin, I. M. Kapchinskii, N. V. Lazarev, V. K. Plotnikov, and B. I. Polyakov	1035	65
Electron Ring Phasotron of the FIAN. I. Parameters and General Description —V. N. Kanunnikov, A. A. Kolomenskii, A. N. Lebedev, E. P. Ovchinnikov, A. P. Fateev, and B. N. Yablokov	1041	71
Electron Ring Phasotron of the FIAN. II. Operating Point and Allowances for Deviations of the Magnetic Field from the Design Value—A. P. Fateev	1045	75
Electron Ring Phasotron of the FIAN. III. Magnet—N. N. Indyukov, V. N. Kanunnikov, A. A. Kolomenskii, D. D. Krasil'nikov, B. V. Rozhdestvenskii, A. M. Stolov, V. A. Titov, A. P. Fateev, and B. N. Yablokov	1052	81
Electron Ring Phasotron of the FIAN. IV. Magnet Supply System—V. S. Voronin, V. N. Kanunnikov, V. A. Papadichev, and S. S. Semenov	1057	86
Electron Ring Phasotron of the FIAN. V. Betatron Cores—L. N. Kazanskii, V. N. Kanunnikov, and B. N. Yablokov	1061	90
Electron Ring Phasotron of the FIAN. VI. Injection—V. G. Gapanovich, L. N. Kazanskii, V. A. Papadichev, O. A. Smirnov, and B . N. Yablokov	1063	93
Electron Ring Phasotron of the FIAN. VII. Vacuum Chamber and Equipment for Beam Indication—A. K. Dezhnev, L. N. Kazanskii, V. N. Kanunnikov, A. A. Kolomenskii, D. D. Krasil'nikov, I. F. Malyshev, E. P. Ovchinnikov, V. A. Papadichev, N. V. Platonov, G. T. Ponomarev, S. S. Semenov, E. F. Troyanov, and B. N. Yablokov.	1068	98
Electron Ring Phasotron of the FIAN. VIII. High-Frequency System—E. A. Dmitriev, V. B. Zalmanzon, A. A. Kolomenskii, A. N. Lebedev, E. P. Ovchinnikov, Z. G. Ryzhik, S. S. Semenov, and A. P. Fateev	1073	103
Electron Ring Phasotron of the FIAN. IX. Geodesic Spacing and Positioning of Electromagnet Blocks—V. A. Papadichev and B. N. Yablokov	1077	107
Electron Ring Phasotron of the FIAN. X. Magnetic Measurements—V. N. Kanunnikov, V. A. Papadichev, A. P. Fateev, and B. N. Yablokov	1081	110
Electron Ring Phasotron of the FIAN. XI. Starting Up the Accelerator—L. N. Kazanskii, V. N. Kanunnikov, A. A. Kolomenskii, E. P. Ovchinnikov, V. A. Papadichev, S. S. Semenov, A. P. Fateev, and B. N. Yablokov	1086	115
Accelerating Protons in a Coaxial Resonator Excited by an H-type Wave—V. K. Plotnikov	1093	122
The Resonator of a System of Multiple Acceleration of Protons in the Synchrophasotron of the Joint Institute for Nuclear Research—V. A. Vagin, V. D. Volodin, A. P. Saenko, I. N. Semenyushkin, and V. L. Stepanyuk	1099	127
Method of Determination of the Parameters of a Charged Particle with Allowance for the Inhomogeneity of the Magnetic Field, Multiple Coulomb Scattering, and Ionization Losses—G. A. Emel'yanenko, G. I. Makarenko, V. I. Moroz, I. S. Saitov, and A. P. Stel'makh	1101	128
Calibration of a Quantometer by Means of a Scintillation γ Spectrometer—V. P. Koptev, S. P. Kruglov, V. M. Suvorov, and E. A. Filimonov	1104	130
β Spectrograph of the Nuclear Research Institute of the Czechoslovak Academy of Sciences —V. Zvolska, T. Kucarova, A. Kuklik, B. Kracik, Z. Machacek, and M. Cerny	1108	134
Mössbauer Spectrometer—T. Tomov and T. Ruskov	1112	138
Particle Identification Using a Cathode-Ray Tube and Mask—A. U. Al'-Dzhauakhiri, V. S. Zazulin, S. D. Kostyuchenkov, A. V. Spasskii, and I. B. Teplov	1117	142
Magnetic Spectrometer for Analyzing Charged Particles with Momenta Up to 2 GeV/c —N. G. Afanas'ev, V. A. Gol'dshtein, S. V. Dementii, L. D. Yaroshevskii, and I. M. Arkatov	1121	146

	Engl.	Russ.
Ionization Chamber as a Resonant γ-Radiation Detector—Ts. Bonchev, K. Burin, and L. Burkov	1123	148
Thin-Window Lithium-Drifted Detector for Spectrometry of Medium-Energy β Particles —Yu. S. Maksimov and M. I. Guseva	1125	150
Filmless Spark Chamber Facility Operating on Line with an Electronic Computer —A. S. Gavrilov, N. N. Govorun, I. A. Golutvin, E. D. Gorodnichev, V. A. Zaginaiko, Yu. V. Zanevskii, I. I. Ivanchenko, S. S. Kirilov, Yu. T. Kiryushin, V. D. Kondrashov, A. P. Kvetov, G. M. Kadykov, V. I. Moroz, G. I. Makarenko, T. S. Nigmanov, O. K. Nefed'ev, V. P. Pugachevich, V. N. Sadovnikov, L. N. Strunov, A. P. Stel'makh, P. I. Filippov, É. N. Tsyganov, and I. V. Chuvilo	1127	151
Performance of Halogen Counters and Some Points on Their Operation—A. B. Dmitriev, A. I. Filatov, and L. S. Éig	1133	157
"Sealed" Helium-3 Gas Scintillation Counter—S. A. Baldin, Yu. A. Makarov, A. D. Sokolov, and G. I. Shuvalov	1138	161
Sensitive Detector for Slow Neutrons—S. N. Vasil'ev, V. A. Kazanskaya, Yu. A. Makarov, and A. D. Sokolov	1141	165
Conversion Efficiency of CsI(Tl) Single Crystals—L. I. Averina, Ya. A. Zakharin, and Yu. A. Tsirlin	1144	168
Optics of the One-Meter Hydrogen Bubble Chamber—V. V. Glagolev, É. V. Kozubskii, L. Kolarzhik, R. M. Lebedev, M. Maly, O. Sgon, and I. Tuma	1146	170
Amplifier with Automatic Gain Control for Precision Amplitude Spectrometers —G. P. Mel'nikov and A. V. Somikov	1147	171
Preamplifier for Germanium Detectors Having a Low Capacity—K. G. Rodionov and Li Sam Ren	1151	175
Automatic Dead-Time Correction in the AI-100 Pulse-Height Analyzer—V. A. Vinokurov and S. P. Vesnovskii	1154	178
Use of Pulse-Modulator Tubes to Produce Long Pulses—L. D. Butakov and B. A. Solntsev	1157	181
Generator of Intense Current Pulses Using Thyristors—B. G. Kudasov	1160	184
Semiconductor High-Voltage Generator—A. M. Gal'per, V. V. Dmitrenko, B. I. Luchkov, and É. M. Shermanzon	1162	186
Use of a Parametrically Excited Circuit as the Signal Transducer in an NMR Spectrometer —N. N. Dzbanovskii, Yu. S. Konstantinov, and A. Z. Yashin	1164	188
Wideband Submillimeter Spectrometer for Study of Absorption of Solids at Liquid Helium Temperature—E. A. Vinogradov, N. A. Prisova, T. S. Mandel'shtam, and T. A. Shmaonov	1167	192
Apparatus for Observing Quadrupole Spin Echo at 150-300 MHz—S. I. Gushchin, V. A. Shishkin, and B. G. Derendyaev	1171	195
3-cm ESR Relaxometer—A. G. Semenov and V. E. Khmelinskii	1173	197
Thermostating during Measurements in Liquids by the Spin-Echo Method—N. K. Gaisin	1175	200
Stabilized High-Voltage Source for Exciting Photomultipliers—R. A. Orlov	1178	202
Noise-Immune Very-High-Vacuum Manometer with Double Modulation of Ion Current —Yu. N. Kotel'nikov	1180	204
Noise-Immune Ionization Manometer for Plasma Equipment—Yu. N. Kotel'nikov, G. P. Kutukov, and V. A. Simonov	1182	206
The Photoelectron Multiplier FÉU-77 for Recording Light Pulses from Optical Quantum Generators (Lasers) in the 700-nm Range—S. G. Dukor, L. V. Kononchuk, and L. G. Leiteizen	1183	207
Method of Measuring the Beats between Longitudinal Modes in a cw Laser—O. B. Danilov and A. L. Mel'tsin	1186	209
Measurement of Coefficients of Inelastic Reflection of Electrons and of Secondary Electron Emission at Large Angles of Incidence of the Primary Beam—I. M. Bronshtein and V. A. Dolinin	1189	212
Stabilization of a Photomultiplier in the Average-Current Mode of Operation —N. S. Tuktarov	1193	216
Improving the Time Characteristics of the FÉU-30 by Eliminating the Effect of Prepulses —É. V. Lan'ko and G. S. Dombrovskaya	1195	218

Pulse-Counting Photometer—E. V. Kubaldin	1196	219
Equipment for Measuring Double Refraction in a Flow—M. M. Kusakov, N. M. Lubman, and L. I. Mekenitskaya	1199	221
Vacuum Apparatus for Magnetooptical Investigations in the Far Infrared Region of the Spectrum—V. M. Naumenko, V. I. Fomin, and V. V. Eremenko	1201	223
Measurement of Thermomagnetic Effects in Pulsed Magnetic Fields—N. G. Gluzman	1203	224
Device for Measuring the Gradient of a Magnetic Field—A. I. Zhernovoi	1206	227
Apparatus for Generating Nanosecond X-Ray Pulses—N. V. Belkin and M. S. Tarasov	1208	229
Control with a Diffusion Chamber Working with an Electron Accelerator at 300 MeV —Yu. M. Arkatov, P. I. Vatset, V. I. Voloshchuk, and V. L. Marchenko	1210	231
Expansion Device and Fast-Acting Valve for Large Bubble Chambers—I. I. Pershin, V. M. Golubchikov, N. S. Konoplev, and A. A. Nikitin	1212	232
Co^{57} Mössbauer Source in Palladium—D. Dobrev, T. Tomov, T. Ruskov, and D. Lefterov	1215	235
Decade Counter Using Semiconductor Devices—V. N. Vishnevskii, V. V. Izokh, and A. V. Prokurov	1218	237
Electromechanical Decatron Counter—M. B. Karel'skaya, B. I. Tverdov, and R. P. Chubarov	1220	239
High-Vacuum Adsorption Pump for Evacuation of Air, Hydrogen, and Helium—A. L. Donde	1222	240
High-Temperature Vacuum Valve—V. I. Petrov and A. P. Kobarenkov	1225	243
Channel Photoelectronic Multipliers with a Dynode of Highly Leaded Glass Reduced in Hydrogen—A. M. Yakobson, G. A. Chuiko, B. M. Glukhovskoi, and V. M. Evtikhieva	1226	244
Photoelectronic Multiplier Spark-Over Indicator—A. F. Dunaitsev and Yu. D. Prokoshkin	1228	245
Evaluating the Brightness of Radioisotopic Graduated Light Sources as a Function of Energy Absorption—A. Ya. Gel'fman, A. R. Daich, and Yu. A. Tsirlin	1229	247
Use of a Logarithmic Amplifier in a Semiconductor Emission-Spectra Recording System —A. B. Ormont and E. K. Pervoi	1231	248
Wide-Range Temperature Regulator—E. A. Golovskii, V. A. Tsymarnyi, and G. D. Yakovlev	1233	249
Device for Uniform Heating of Small Specimens—V. V. Bichevin	1235	251
Cryostat for Neutron-Diffraction Studies at 0.87-4.2°K—A. S. Bulatov	1237	252
Cryostats for Measuring Electrical, Thermoelectric, Galvanomagnetic, and Thermomagnetic Properties—N. I. Davidenko and I. G. Fakidov	1239	254
NEW INSTRUMENTS		
Pistonless Thermal-Action Gas Compressor—S. S. Boksha	1241	257
Compact Steam-Water Ejector Vacuum Pump NÉV-0.2 × 20 PK with Independent Steam Feed —A. B. Tseitlin and N. V. Sutugin	1242	258
Fast-Acting Electronic Potentiostat IP-410B—R. Filipov	1242	258
Neutron Dosimeter DN-A-1	1243	259
Wide-Aperture DFS-12 Spectrometer	1244	260
IT-02 Three-Strip Ion Source	1245	260
Automatic FÉR-1 Flow Refractometer	1245	261
Micropendulum—Tool for Studying Relaxation Properties of Single Crystals	1246	261
VTK-20 Quadrant Technical Balance	1246	262
ERRATA	1248	

Number 6 November-December, 1967

Methods of Allowing for Coulomb Scattering and Bremsstrahlung when Analyzing Tracks in Propane Bubble Chambers (Survey)—Yu. A. Budagov, V. B. Vinogradov, A. G. Volod'ko, L. N. Gerdyukov, V. P. Dzhelepov, S. V. Klimenko, V. G. Novikov, I. Patochka, V. B. Flyagin, and P. V. Shlyapnikov	1249	5
Obtaining Low-Duration Intense Ion Fluxes—S. G. Alikhanov, E. P. Matochkin, A. S. Mirzayan, and A. A. Podminogin	1262	20

Injector Providing Stationary 0.5-A 115-keV Hydrogen-Ion Beams and 0.15-A 75-keV Helium-Ion Beams—N. V. Pleshivtsev, G. G. Tomashev, Yu. F. Grigorovich, V. V. Nizhegorodtsev, O. G. Matveenko, and B. K. Shembel'	1265	23
14-MeV Neutron Pulse Generator with Low Background between Pulses—Z. A. Al'bikov and L. V. Semkov	1271	28
Utilization Coefficient of Hydrogen in a High-Current Ion Source with Magnetized-Plasma Emitter—N. V. Pleshivtsev, O. G. Matveenko, and A. S. Vlasov	1274	31
Obtaining Low-Energy Beams of Hydrogen Ions—Yu. M. Khirnyi and L. N. Kochemasova	1277	33
Simple Device for the Deflection and Rotation of Intense Ion Beams—G. F. Loshchenov and N. V. Pleshivtsev	1279	35
Working Conditions of a Diffusion Chamber Filled with Hydrogen at a Pressure of 0.1 atm—D. B. Damyanov, V. M. Tsupko-Sitnikov, and Yu. A. Shcherbakov	1281	37
Radiation Stability of ZnS(Ag) Crystals Bombarded by Charged Particles—T. I. Sokolovskaya, N. I. Krainyukov, R. A. Nikulina, and Yu. A. Tsirlin	1283	39
Effect of Placement Errors in the Elements of an Ion-Optical System on Particle Motion—L. M. Bazhenova, L. P. Zinov'ev, and R. N. Fedorova	1285	40
Achromatic Rotation-Focusing System for Injecting Particles into the OIYaI Synchrophasotron—L. M. Bazhenova, L. P. Zinov'ev, R. N. Fedorova, and A. L. Shirokova	1287	42
Ignitron Converter Control System for Powering Semiconductor Proton Synchrotrons—L. F. Kleopov and G. L. Kugushev	1289	43
Method for Obtaining γ-Ray Spectra Based on the (n,n'γ) Reaction in Thin Scattering Foils—S. P. Sit'ko and V. I. Strizhak	1291	45
Two-Crystal Neutron Diffractometer with a Movable Monochromator—B. I. Khrushchev and L. S. Sharipova	1294	48
Effect of Background Loading on Efficiency of a Spark Chamber—A. S. Vovenko, M. Ya. Vyrenkova, J. Hladky, B. N. Gus'kov, A. L. Lyubimov, and L. A. Savin	1296	50
Spark Chamber with Improved Spatial Isotropic Behavior—M. I. Kozlov and N. S. Rudenko	1299	53
Restoration of the Spatial Coordinates of the Points on (Particle) Tracks by Reference to Two Stereo Projections—L. M. Ivanchenko, N. A. Krutkova, V. I. Moroz, T. G. Ostanevich, and G. N. Tentyukova	1302	56
Vinylaromatic Plastic Scintillators—A. V. Chernobai, O. A. Gunder, R. S. Mil'ner, L. I. Dmitrievskaya, M. I. Dovgosheya, and A. S. Dykhanova	1304	58
Spectrometer with a Single Organic Scintillator for γ-Ray Spectrometry against a Neutron Background—L. A. Trykov, I. V. Goryachev, and V. I. Kukhtevich	1308	62
Compensation for Increasing the Accuracy of Time-Interval Measurements—V. D. Maisyukov and S. N. Fedorchenko	1310	64
Coincidence-Anticoincidence Circuit Using a Tunnel-Diode Pair—A. A. Sanin and P. N. Shareiko	1317	70
Tunnel-Diode 100-MHz Indicating Scaler Decade—I. Mantsa, B. A. Zelenov, L. K. Lebedeva, and M. A. Plyshevskii	1322	76
Stabilization of the Plane Segment of a Pulse by the Introduction of Negative Feedback—Yu. S. Cherkashin	1326	80
Multichannel Accumulator Based on the AI-100 Analyzer—A. F. Chernyavskii and S. S. Shushkevich	1330	84
Distributed-Pulse Generator—L. K. Samoilov and V. E. Mel'nik	1334	88
Transistorized High-Frequency Oscillator with Smooth Variation of Voltage Phase—S. S. Barkalov	1336	90
Direct-Current Voltage Amplifier for Measuring the Hall Effect in High-Resistance Specimens—A. P. Sakalas	1338	92
Signal-Frequency Image Converter—N. V. Kravtsov and L. E. Chirkov	1341	95
Frequency Division for a Wide Range of Change in Division Coefficient—V. B. Efimov and E. A. Berdyanskii	1344	97
EPR Spectrometer for Studying Specimens at Hydrostatic Pressures to 10,000 kg/cm^2—T. I. Alaeva	1346	99
Measurement of Nuclear Spin Relaxation Times T_1 and T_2 in Paramagnetic Solutions—V. E. Kul'beda	1353	106

Equipment for Investigating the Dynamic Polarization of Nuclei in a Medium Magnetic Field —N. M. Ievskaya and B. D. Malyshev 1356 108
High-Resolution NMR Spectrometer—Yu. Yu. Samitov, A. V. Aganov, and L. I. Vinogradov 1359 111
Improved-Resolution Beam-Type-Maser Radio Spectroscope—A. F. Krupnov, V. A. Skvortsov, and L. A. Sinegubko 1361 112
Measurement of the Microwave Electrical Conductivity of Semiconductors and Epitaxial Semiconductor Films—A. B. Davydov and Yu. G. Arapov 1363 113
Instrument for Studying Ultrasound Absorption—V. D. Fil' 1367 117
Instrument for Plotting the Spectral Noise Distribution in Semiconductors—K. M. Kulikov 1369 119
Measurement of the Resistivity of Semiconductor Materials by the Resonator Method —G. F. Bakanov, D. V. Iremashvili, N. I. Leont'ev, and G. M. Mailov 1371 121
Automatic Torque Magnetometer for Measuring Anisotropy Constants of Ferrites—K. M. Polivanov, E. I. Kalugin, and V. V. Gaiduchenko 1372 122
Power Supply for Gas-Discharge Instruments—V. G. Luzhetskii 1374 123
Pumping Action in Type MM-14 Inverted-Magnetron Vacuum Pressure Gages—V. T. Grinchenko and G. A. Nichiporovich 1376 125
Application of Light Simulation to the Study of Directionality of Molecular Beams —A. I. Fedorenko 1379 128
High-Temperature Evaporator for the ÉG-100A Electron-Diffraction Camera—N. P. Levkin, Yu. M. Kushnir, P. P. Barzdain, and N. V. Alekseev 1382 130
Improving the Technical Time Resolution of the PIM-3 Data-Display Device in Electron-Optical Chronography—B. A. Demidov and S. D. Fanchenko 1385 133
Photon Counts in Microspectrophotometry—O. A. Shmykov, B. I. Shitikov, and V. A. Bryzgunov 1388 136
Measurement of Transit-Time Spread of Photoelectrons in an FÉU-30 Photomultiplier Operating in the Time Mode—Yu. A. Kulinich and V. G. Rukavishnikov 1393 140
Criteria of Stability of the Gain of a Photomultiplier Operating in the Spectrometric Mode —A. N. Pertsev and P. N. Tolkach 1396 142
High-Temperature Black Body for the Far Infrared Part of the Spectrum—O. K. Filippov and E. V. Ukhanov 1399 144
Photoionization Method of Determining the Ionization Potentials of Adsorbed Molecules —V. M. Bentsa, F. I. Vilesov, and Yu. A. Aleksandrov 1402 147
Simplified "Phase" Spectrophotometer and Its Application in Research on Small Specimens in the 0.4 to 1.0 μ Range—L. A. Palitsyna 1407 151
Study of the Frequency Characteristics of Photodiodes by the Method of Double Light-Beam Modulation—N. N. Kolachevskii and A. M. Noginov 1410 154
Optimum Measurement Time—A. I. Petrukhin and Yu. D. Prokoshkin 1412 155
650-mA Ion Gun—D. V. Karetnikov, O. G. Matveenko, and V. V. Nizhegorodtsev 1414 157
System for Photographing Bubble Chambers with Small Viewing Windows—K. N. Ermakov, A. P. Komar, V. V. Miroshkin, and M. V. Stabnikov 1417 159
Effect of Water on Flash Intensity in Water-Dioxan Scintillators—L. Ya. Zhil'tsova, E. N. Matveeva, and M. N. Medvedev 1419 161
Reader for Thermoluminescent Dosimeters—K. M. Kudelin 1421 162
Decade Counter with Indication by Means of Light Diodes—L. B. Iogansen and A. A. Iogansen 1423 164
IN-1 Readout-Tube Control Using Transistors and a Decatron—V. I. Solomin and O. M. Isakov 1425 166
Electronic Switch for the PS-100 Scaler—E. A. Zel'din 1426 167
Reversible Trigger Unit with Increased Noise Immunity—V. V. Dobyrn and D. A. Asfendiarov 1427 168
High-Speed Transistor Blocking Oscillator with No External Bias—V. N. Slyusar' 1429 169
Radio-Frequency Synchronous Detector Using Transistors—L. N. Novikov 1430 171
Stabilized Power Supply for Arc Spectral Lamps—G. A. Grinev 1432 173
Interference Micromanometer—A. F. Bogatyrev, N. D. Kosov, and L. I. Kurlapov 1434 174
Manufacture of Thin Field-Emission Electron Emitters—G. N. Freiberg 1436 176
Low-Temperature Blackbody Based on the Thermoelectric Refrigerator—A. V. Kogan, E. A. Kolenko, and E. S. Nechai 1439 178

Method of Observing the Time Structure of a Laser Pulse—I. L. Abrikosova and A. L. Shal'nikov	1441	180
Time-Sweep Scanner for Flash Spectrum of Light—A. P. Petkov	1442	181
High-Temperature Cell for Taking Infrared Spectra of Vapors of Solids and Liquids—B. V. Lopatin	1444	182
Sample Cell for Spectral Analytical Instruments Featuring Resistance to Corrosive Attack —K. S. Losev, P. L. Bresler, L. E. Zaslavskii, and M. I. Drapkin	1446	184
Total-Reflection Rectangular Prism as a Spectroscopic Rotating Optical System—A. Petrakev	1447	185
Time Parameters of the FÉU-72 Photomultiplier—V. V. Vorob'ev, L. V. Semkov, and R. S. Shuvalov	1448	186
Increasing the Accuracy of Hall Generators—A. L. Struchkov and V. L. Tikhonov	1450	187
Nuclear Magnetometer with Flowing Water—V. A. Yudin	1452	188
Dependence of the Resolution of an X-Ray Spectrometer on the Radius of Curvature of the Crystal and the Slit Width—V. A. Trapeznikov and V. A. Trofimova	1455	191
Preparation of Contacts on n-Type Germanium that Are Neutral in Strong Electric Fields —E. A. Movchan	1457	192
Level Sensor for a Dielectric Liquid—S. R. Garber	1458	193
Thermostating of Internally Heated High-Hydrostatic-Pressure Chambers—V. A. Ivanov and S. M. Stishov	1460	195
Arrangement for Studying the Electro-optical Properties of Crystals at Low Temperatures —A. S. Sonin, B. A. Strukov, A. S. Vasilevskaya, N. D. Gavrilova, L. A. Slepkov, and V. G. Kolobrodov	1462	197
Adsorption of Helium on a Copper Surface at 4.2°K—N. P. Danilova and A. L. Shal'nikov	1464	199
Liquid-Gas Level Indicator—M. V. Zinov'ev and V. K. Chernetskii	1465	200
NEW INSTRUMENTS		
The AI-50-2 Pulse Analyzer	1467	202
The AI-256-1 Pulse Analyzer	1467	203
The PP-9-1 Decade Scaler	1468	203
General-Purpose USD-1 Scintillation Sensor	1469	204
The UMD-5 Ultramicrotome	1469	205
